Russian

### PROFILE

I'm a 16 year old software engineer specializing in building frontend with backend services. I have worked on some projects and gained experience. Currently have 3 years experience. My name is Nika and I enjoy creating things that live on the internet. My interest in web development started back in 2020 when I decided to try creating custom website. After that moment, I realized how much I love this job and decided to become a programmer

### My Knowledge

- Can create fully functional website with frontend and backend.
- As frontend developer: Html, Css, Bootstrap, Tailwind Css, Material UI, Shadcn/ui, Javascript, Typescript, React.js, Next.js experience. Worked with Angular.
- As backend developer: Node.js, Express.js, REST API, GraphQL, MongoDB, Mongoose, Prisma
- Built more than 3 fully functional websites.
- Have experience with 2 real-time projects via freelancer.
- I can master any library quickly and with high quality.

### My Stack

- 1) HTML
- 2) CSS/ Scss
- 3) Tailwind/Bootstrap/Material UI/ Shadcn/ui
- 4) React/Next
- 5) Node/Express
- 6) MongoDB
- 7) Angular/Universal
- 8) Mongoose/Prisma
- 9) Important React libraries for creating successful UI/UX.
